

Lionbridge

Lionbridge Connector for Episerver

Version 1.2.3

Release Notes

March 4, 2016

Overview

Welcome to the Lionbridge Connector for Episerver (Connector). The Connector enables you to automate sending and retrieving content from your Episerver CMS, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages

System Requirements

The Lionbridge Connector for Episerver supports Episerver versions 7.5 or higher, including all current releases. The Lionbridge Connector for Episerver has no additional hardware or software requirements beyond those of Episerver. For detailed requirements, refer to the Episerver documentation, available at: <http://world.episerver.com/documentation>.

What's New?

- You install the Connector package from a NuGet package (.nupkg) using the NuGet Package Manager, from within Visual Studio.

- You can now activate and configure translation backup jobs.
- The Connector now supports importing a project that has not yet been fully translated.
- The Connector now automatically updates translation projects with redelivered assets.
- You can now create language mappings to Episerver language codes.
