LIONBRIDGE

Lionbridge Connector for Episerver

Version 1.6.3

Release Notes

Wednesday, May 5, 2021

Overview

Welcome to the Lionbridge Connector for Episerver (Connector). The Connector enables you to automate sending and retrieving content from your Episerver CMS, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages.

How to Contact Lionbridge Connector Support

Email @: connectors@lionbridge.com

You can submit a support ticket either:

- by email
- from the Lionbridge Connector Zendesk page, using your web browser:
  https://connectors.zendesk.com/

For more information, visit: http://connectors.lionbridge.com/docs/Common/Support_Liox.htm

System Requirements

The Lionbridge Connector for Episerver supports Episerver versions 10 and 11.

The Lionbridge Connector for Episerver has no additional hardware or software requirements beyond those of Episerver. For detailed requirements, refer to the Episerver documentation, available at: http://world.episerver.com/documentation.

What's New?

- Added the new feature update on translated assets in two scenarios:
  - Publish option:
    - Publish if source is Published.
    - Publish if source is not Published.
  - Import option:
    - Keep all from source translation.
    - Merge source translation and target.
- Asset Log view can be accessed from the **Connector Settings cog**.
- Translate Blocks in xhtmlstring:
  - Blocks within xhtmlstring previously had to be manually added to a **Translation Project**. Now they will be automatically included similar to standard Blocks.
- Translate button link within xhtmlstring:
  - Block type Button Link with text is supported for translation now.

Issues Fixed in This Release

Issue ID	Description
1	Connector now exports out the latest version of an asset rather than the latest published version.
2	Connector overwrites references rather than adding to existing references after translation.
